

## Organizational Project Management Maturity (*OPM3*®) Assessments and Improvement Programs

The Project Management Institute's *OPM3* emphasizes the value of organizational project management in the execution of organizational strategies. PMI, with its partner, DNV, has set up a certification program for individuals to conduct *OPM3* assessments and to work to identify an *OPM3* improvement program using a robust tool, *OPM3* Product Suite. Organizations that have conducted these assessments note benefits such as fewer cost and schedule overruns, improved customer and team satisfaction, and a reduction in redundant programs and projects.

- 1. *OPM3* Maturity Assessment.** A TenStep certified *OPM3* Assessor will work with your organization to assess its project management maturity. We will work with you to scope and tailor this assessment to meet your organization's unique needs. During the assessment, we will conduct interviews and review your existing portfolio, program, and project management processes, procedures, and guidelines. We will then analyze the data and prepare and deliver a detailed report of our findings according to the *OPM3* Best Practices your organization has achieved. We will then transfer the data to you for your later use.
- 2. *OPM3* Improvement Program.** A TenStep *OPM3* Consultant will work with your organization to plan which Improvement Best Practices your organization should implement based on your priorities, their attainability, benefits, and cost. We also can work with you to build a metric path to business performance improvements.
- 3. Support to Implement Specific Best Practices.** TenStep consultants can work with you further to help you set up processes, procedures, and guidelines to quickly and effectively implement the key areas of improvement based on the *OPM3* Program.

You receive the following products and services:

- An analysis of the Best Practices in your organization according to the *OPM3* Assessment.
- A detailed report and presentation on where your organization stands according to the *OPM3* model.
- An improvement plan to help you gain a competitive advantage based on implementing the key Best Practices that are not now in place.
- Assistance in implementing identified improvements using a customized set of processes, techniques, and templates to meet your needs.

The *OPM3* maturity model was developed as a framework, path, and guide to manage and improve organizational project management processes. Our certified *OPM3* Assessors and Consultants can work with you to determine the best practices that will help you achieve a competitive advantage.

**TenStep - we help you raise the bar!**
